### CMPAS GreenPower Product Information

Green pricing programs such as CMPAS GreenPower are based on the buying and selling of renewable energy certificates (RECs) Each kilowatt-hour (kWh) of electricity generates one REC.

CMPAS utilities purchase additional RECs on behalf of GreenPower customers to offset an equivalent amount of conventional (non-renewable) generation sources in the electric transmission grid. Once RECs are used for this purpose, they are retired.

CMPAS GreenPower purchases RECs from the Wolf Wind Farm in Nobles County, MN.

### GreenPower Options

Yes! I want to buy a 100 kWh block of CMPAS GreenPower for \$2 a month. Please add the additional charge to my electric utility bill.

Yes! I want to buy a 200 kWh block of CMPAS GreenPower for \$4 a month. Please add the additional charge to my electric utility bill.

Yes! I want to buy a 300 kWh block of CMPAS GreenPower for \$6 a month. Please add the additional charge to my electric utility bill.

My commitment is for a minimum period of 12 months, and I understand that my commitment is automatically renewed on an annual basis until I notify my municipal utility in writing to end my participation.
